

## ISRAEL JOURNAL OF MATHEMATICS

## TABLE OF CONTENTS, VOLUME 204, 2014

AISTLEITNER, C. <i>Quantitative uniform distribution results for geometric progressions</i>	155
BAE, Y. J. <i>On the growth sequence for symplectically hyperbolic manifolds</i>	417
BALLESTER-BOLINCHE, A., R. ESTEBAN-ROMERO AND L. M. EZQUERRO <i>On the <math>p</math>-length of some finite <math>p</math>-soluble groups</i>	359
CAVIGLIA, G., A. CONSTANTINESCU AND M. VARBARO <i>On a conjecture by Kalai</i>	469
CHEN, Q. AND D. WANG <i>A Maschke type theorem for weak group entwined modules and applications</i>	329
CHEN, S., A. RASILA AND X. WANG <i>Radial growth, Lipschitz and Dirichlet spaces on solutions to the non-homogenous Yukawa equation</i>	261
CHERNIKOV, A. AND M. HILS <i>Valued difference fields and <math>NTP_2</math></i>	299
CONSTANTINESCU, A. See G. CAVIGLIA	
ESTEBAN-ROMERO, R. See A. BALLESTER-BOLINCHE	
EZQUERRO, L. M. See A. BALLESTER-BOLINCHE	
GISHBOLINER, L. AND A. SHAPIRA <i>Deterministic vs non-deterministic graph property testing</i>	397
GUO, X. See G. LIU	
HILS, M. See A. CHERNIKOV	
HRIC, R. AND T. JÄGER <i>A construction of almost automorphic minimal sets</i>	373
JÄGER, T. See R. HRIC	
JANTZEN, C. AND B. LIU <i>The generic dual of <math>p</math>-adic split <math>SO_{2n}</math> and local langlands parameters</i>	199
JIANG, Q. See C. SHAO	
LIU, B. See C. JANTZEN	
LIU, G. AND X. GUO <i>Harish-Chandra modules over generalized Heisenberg–Virasoro algebras</i>	447
MARTÍN-MORALES, J. <i>Embedded <math>\mathbf{Q}</math>-resolutions for Yomdin–Lê surface singularities</i>	97
MONTALBÁN, A. AND R. A. SHORE <i>The limits of determinacy in second order arithmetic: consistency and complexity strength</i>	477

RASILA, A. See S. CHEN	
SHAO, C. AND Q. JIANG <i>An extension of a theorem of Alan Camina on conjugacy class sizes</i>	145
SHAPIRA, A. See L. GISHBOLINER	
SHELAH, S. <i>Strongly dependent theories</i>	1
SHORE, R. A. See A. MONTALBÁN	
VARBARO, M. See G. CAVIGLIA	
WANG, D. See Q. CHEN	
WANG, X. See S. CHEN	
YANG, C. F. <i>An inverse problem for a differential pencil using nodal points as data</i>	431
YANG, C. F. <i>Solutions to open problems of Yang concerning inverse nodal problems</i>	283
ZORIN-KRANICH, P. <i>Return times theorem for amenable groups</i>	85
