

A word of warning about *Self similar sets, entropy and additive combinatorics*” by Michael Hochman

Unfortunately a few errors got into the published version of my paper in the title. Most importantly, Propositions 3.5 and 3.8 were meant to be heuristic statements and are intentionally false (as a careful reading will show). This should have been indicated by quotation marks, as it is in the arxiv version of the paper, but they didn't make it into the final version.

To avoid confusion, I recommend that readers refer to the most recent version on the arxiv instead of the print version.

(Michael Hochman, December 2014).
