TABLE OF CONTENTS

VOLUME CXXX

Lucas C. F. Ferreira, Marcelo Montenegro, and Matheus C. Santos — Existence and symmetry for elliptic equations in $\mathbb{R}^n$ with arbitrary growth in the gradient 1

Felix Pogorzelski and Fabian Schwarzenberger — A Banach space-valued ergodic theorem for amenable groups and applications 19

J. K. Langley — The Schwarzian derivative and the Wiman-Valiron property 71

Nikos Frantzikinakis, Emmanuel Lesigne, and Máté Wierdl — Random differences in Szemerédi's Theorem and related results 91

Rafael Andrist, Franc Forstnerič, Tyson Ritter, and Erlend Fornæss Wold — Proper holomorphic embeddings into Stein manifolds with the density property 135

Evgeny Korotyaev — Estimates of 1D resonances in terms of potentials 151

Zhiqin Lu and Steve Zelditch — Szegő kernels and Poincaré series 167

Filippo Bracci and Pavel Gumenyuk — Contact points and fractional singularities for semigroups of holomorphic self-maps of the unit disc 185

Pavel Zorin-Kranich — Norm convergence of multiple ergodic averages on amenable groups 219

Tim Austin — Non-conventional ergodic averages for several commuting actions of an amenable group 243

Antônio Sá Barreto — A local support theorem for the radiation fields on asymptotically euclidean manifolds 275

Constanze Liaw and Sergei Treil — Clark model in the general situation 287

David Seifert — Rates of decay in the classical Katznelson-Tzafriri Theorem 329

Anahit Galstian and Tamotu Kinoshita — Representation of solutions of second order one-dimensional model hyperbolic equations 355

Continued on the next page

L. Amour and J. Nourrigat — Weyl composition of symbols in large dimension 375

J. Bourgain — A note on the Schrödinger maximal function 393
