

## TABLE OF CONTENTS

### VOLUME CXLIX

#### PART 1

MARÍA EUGENIA CEJAS, CAROLINA MOSQUERA, CARLOS PÉREZ AND EZEQUIEL RELA — Self-improving Poincaré–Sobolev type functionals in product spaces	1
PHUOC-TRUONG HUYNH AND PHUOC-TAI NGUYEN — Semilinear nonlocal elliptic equations with source term and measure data	49
NICOLA GAROFALO AND GIULIO TRALLI — A heat equation approach to intertwining	113
JAN ROZENDAAL — Rough pseudodifferential operators on Hardy spaces for Fourier integral operators	135
TATSUO NISHITANI — The Cauchy problem for operators with triple effectively hyperbolic characteristics: Ivrii’s conjecture	167
SERGIÍ MYROSHNYCHENKO — On some characterizations of convex polyhedra	239
YUAN XU — Fourier orthogonal series on a paraboloid	251
PRITAM GANGULY AND SUNDARAM THANGAVELU — Analogues of theorems of Chernoff and Ingham on the Heisenberg group	281
LAURENT BÉTERMIN AND MARKUS FAULHUBER — Maximal theta functions universal optimality of the hexagonal lattice for Madelung-like lattice energies	307
LUCA BATTAGLIA, MARÍA MEDINA AND ANGELA PISTOIA — A blow-up phenomenon for a non-local Liouville-type equation	343
OLLI HIRVINIEMI, LAURI HITRUHIN, ISTVÁN PRAUSE AND EERO SAKSMAN — On mappings of finite distortion that are quasiconformal in the unit disk	369

## PART 2

JIAN-WEN SUN — Sharp patterns for some semilinear nonlocal dispersal equations	401
FLORIAN K. RICHTER — Uniform distribution in nilmanifolds along functions from a Hardy field	421
ALI MAALAOUI, ANDREA PINAMONTI AND GARETH SPEIGHT — Function spaces via fractional Poisson kernel on Carnot groups and applications	485
GIORGOS CHASAPIS, KEERTHANA GURUSHANKA AND TOMASZ TKOCZ — Sharp bounds on $p$ -norms for sums of independent uniform random variables, $0 < p < 1$	529
FEDOR SUKOCHEV AND DMITRIY ZANIN — Resolution of a problem by Simon concerning Schrödinger operators via methods from noncommutative geometry	555
HONGKI JUNG — A sharp $L^{10}$ decoupling for the twisted cubic	563
SIMONE CIANI, SUNRA MOSCONI AND VINCENZO VESPRI — Parabolic Harnack Estimates for anisotropic slow diffusion	611
CONG WANG AND JIABAO SU — Weighted critical Hénon equations with $p$ -Laplacian on the unit ball in $\mathbb{R}^N$	643
SHUKUN WU — On the Bochner–Riesz operator in $\mathbb{R}^3$	677
SEBASTIÁN DONOSO, ANH N. LE, JOEL MOREIRA AND WENBO SUN — Additive averages of multiplicative correlation sequences and applications	719
HAN YU — On the metric theory of multiplicative Diophantine approximation	763
