

TABLE OF CONTENTS

VOLUME LXXX

J. BOURGAIN — On diffusion in high-dimensional Hamiltonian systems and PDE	1
JEAN BOURGAIN, HAIM BREZIS AND PETRU MIRONESCU — Lifting in Sobolev spaces	37
A. B. CRUZEIRO, S. FANG AND P. MALLIAVIN — A probabilistic Weitzenböck formula on Riemannian path space	87
LARS HÖRMANDER — Local P -convexity	101
JEAN-PIERRE KAHANE — Baire's category theorem and trigonometric series	143
HARRY KESTEN — Coalescing and annihilating random walk with 'action at a distance'	183
J. L. LIONS — Virtual and effective control for distributed systems and decomposition of everything	257
G. A. MARGULIS AND G. D. MOSTOW — Some remarks on the definition of tangent cones in a Carnot–Carathéodory space	299
ALEXANDER RAMM AND BARRY SIMON — A new approach to inverse spectral theory, III. Short-range potentials	319
E. M. STEIN AND S. WAINGER — Discrete analogues in harmonic analysis II: Fractional integration	335
