

TABLE OF CONTENTS

VOLUME LXXXVI

M. BELLO HERNÁNDEZ, B. DE LA CALLE YSERN, J. J. GUADALUPE HERNÁNDEZ AND G. LOPEZ LAGOMASINO — Asymptotics for Stieltjes polynomials, Padé-type approximants, and Gauss–Kronrod quadrature	1
DER-CHEN CHANG AND SONG-YING LI — A zeta function associated to the sub-Laplacian on the unit sphere in \mathbb{C}^N	25
CESARE PARENTI AND ALBERTO PARMEGGIANI — Lower bounds for systems with double characteristics	49
AMOS NEVO AND ROBERT J. ZIMMER — A generalization of the intermediate factors theorem	93
D. LI, H. QUEFFÉLEC AND L. RODRÍGUEZ-PIAZZA — Some new thin sets of integers in harmonic analysis	105
ALEXANDRU ALEMAN, STEFAN RICHTER AND CARL SUNDBERG — The majorization function and the index of invariant subspaces in the Bergman spaces	139
BERNARD HOST AND BRYNA KRA — An odd Furstenberg–Szemerédi theorem and quasi-affine systems	183
WILLIAM ABIKOFF — Conformal barycenters and the Douady–Earle extension—A discrete dynamical approach	221
SHUZO IZUMI — Flatness of differentiable functions along a subset of a real analytic set	235
KONSTANTIN M. DYAKONOV — Zero sets and multiplier theorems for star-invariant subspaces	247
AI HUA FAN — Asymptotic behaviour of multiperiodic functions scaled by Pisot numbers	271
V. MATSAEV, I. OSTROVSKII AND M. SODIN — Variations on the theme of Marcinkiewicz’ inequality	289
FABRICE PLANCHON — Dispersive estimates and the 2D cubic NLS equation	319
BERND KAWOHL AND GUIDO SWEERS — Among all two-dimensional convex domains the disk is not optimal for the lifetime of a conditioned Brownian motion	335
LOUIS DUPAIGNE — A nonlinear elliptic PDE with the inverse square potential	359
