

TABLE OF CONTENTS

VOLUME LXXII

ANNE BOUTET DE MONVEL AND IRA EGOROVA — On solutions of nonlinear Schrödinger equations with Cantor-type spectrum	1
M. D. BOSHERNITZAN AND C. R. CARROLL — An extension of Lagrange’s theorem to interval exchange transformations over quadratic fields	21
ALANO ANCONA — First eigenvalues and comparison of Green’s functions for elliptic operators on manifolds or domains	45
SAMUEL L. KRUSHKAL AND REINER KÜHNAU — A quasiconformal dynamic property of the disk	93
BERNARD LASCAR AND RICHARD LASCAR — FBI transforms in Gevrey classes	105
TOSHIHIKO HOSHIRO — On weighted L^2 estimates of solutions to wave equations	127
D. BSHOUTY AND W. HENGARTNER — Boundary values versus dilatations of harmonic mappings	141
FRANK DEN HOLLANDER AND JEFFREY E. STEIF — Mixing properties of the generalized T, T^{-1} -process	165
LEN BOS AND JEAN-PAUL CALVI — Kergin interpolants at the roots of unity approximate C^2 functions	203
P. D. DRAGNEV AND E. B. SAFF — Constrained energy problems with applications to orthogonal polynomials of a discrete variable	223
MIRAN ČERNE — Regularity of discs attached to a submanifold of C^n	261
KATSUNORI IWASAKI — Regular simplices, symmetric polynomials and the mean value property	279
J. BOURGAIN — On growth in time of Sobolev norms of smooth solutions of nonlinear Schrödinger equations in \mathbb{R}^D	299
Correction to “On the fix-points of composite functions and generalizations” by Chung-Chun Yang and Jian-Hua Zheng, Journal d’Analyse Mathématique 68 (1996), 59–93	311
